SOUND FOUNDATION
FOR BABIES AND TODDLERS
HELP GUIDE YOUR CHILD ON THEIR HEARING JOURNEY

SOUND FOUNDATION

Develop your child’s spoken language through listening. As the world leader in implantable hearing innovations, Cochlear addresses the whole child and family as part of the habilitation process. Our commitment is to provide a lifetime of support for your child’s hearing journey and access to an aural habilitation technology through a personalized program designed to meet your child’s individual language, listening, and educational goals. We recommend starting with Sound Foundation for Babies and moving to Sound Foundation for Toddlers.

SOUND FOUNDATION FOR BABIES

Sound Foundation for Babies is a habilitation tool supporting parents for the first 12 months after getting a hearing solution. The tool consists of 40 weeks of activities in the areas of audition, receptive language, expressive language and speech, as well as a song and story book for each week. The activities are designed to fit easily into everyday life as well as provide the knowledge and understanding of the theory behind the weekly goals identified. Each week’s materials may be viewed and printed individually.

SOUND FOUNDATION FOR TODDLERS

Sound Foundation for Toddlers builds on Sound Foundation for Babies, supporting parents through the second year after getting a hearing solution. This resource is designed for children of 24 to 36 months of age, consists of 40 weekly activities in audition, receptive language, expressive language and speech as well as a song and story book for each week. You will find hundreds of games, activities and ideas to support you in working with your child’s spoken language.

As the leading global expert in implantable hearing solutions, Cochlear is dedicated to bringing the gift of sound to people all over the world. For thirty years, Cochlear has pioneered this technology, helping more than a quarter of a million people reconnect to their families and friends.

Along with the industry’s largest investment in research and development, we continue to partner with leading international researchers and hearing professionals, ensuring that we are at the forefront of hearing science.

For our customers, that means access to our latest technologies throughout their lives, and the ongoing support they need.

That is why seven out of ten people worldwide who choose a cochlear implant choose Cochlear as their hearing partner.
